Through years of research, development, refinement and, let's face it, sheer abuse, the MOPAR small block has become well known and respected for its ability to make lots of power on a budget. And with modern power adders, they can do it with daily driver reliability. Equally important is that they fit every chassis just about perfectly.

~~MOPAR Small Block Crate Engines~~

As mentioned earlier, the Edelbrock small block Mopar cylinder heads are a direct bolt on replacement for your factory stock heads. This also means that you can use your stock exhaust manifolds or headers. Hedman and Hooker headers are a popular choice. There are plenty of used sets for sale if your budget doesn't allow for brand new headers.

We wanted to stay old school, and since we're road racing and taking long trips, Mopar's LA series small-block seemed to make more sense. So we checked with our Mopar friends and got some solid advice on where to start on our 408ci stroker. Unless you purchase an R3 race block — which will set you back a little over four large — or the R4 Pro-Stock race block, don't bother with a 4 ...

~~Mopar Small Block V8~~

Mopar fans have a good reason to get excited with the introduction of Trick Flow's power port 190 cylinder head for small block Mopars. An exclusive feature of this head is the modified push rod location. Which allows the head to fit both LA and Magnum engines with flat tappet or roller cam shafts. In addition accessories holes have been drilled into the head to fit both engine types. It all ...

Small block Mopar rockers for the LA 360 Dodge engine Edelbrock heads. Today I'm going to do a quick review on rocker arm options for these heads for the small block LA engine. The Edelbrock part number we're discussing is the 60779 option, for hydraulic flat tappet camshafts. Suitable for LA engines from 1968 to 1991.

Mopar 340 cu in (5.6 L) Small Block. In the mid-1960s, Chrysler decided to adapt the 318 cu in (5.2 L) small block V8 into a lightweight, high output engine equally suited for drag strip or street performance use. Its block was bored out to 4.04 in (102.6 mm) but 3.31 in (84.1 mm) stroke left unchanged, resulting in the 340 cu in (5.6 L) engine introduced for the 1968 model year. Anticipating ...

While 4.00-inch stroker cranks are the common upgrade for Mopar small-blocks, Jesse opted to go considerably further, with a 4.25-inch stroke crankshaft from BPE. The 4.040-inch bore combined with...

~~This 436ci Small Block Mopar Makes Big Block Power On Pump Gas~~

This 408 Mopar Small Block Stroker Crate Engine is based on the 360 Chrysler engine. It features a forged steel stroker crank that provides big-block torque in a small-block package. H-Beam rods and forged pistons complete the stout bottom end. A hydraulic roller camshaft and aluminum heads provide 470 HP worth of Mopar muscle.

~~408 Mopar Small Block Stroker Crate Engine: M408 HR C1~~

The Mopar 360 is the easiest and cheapest way to build a fast small-block Mopar. It makes more power than the 318 and it's a lot cheaper to build than a 340. It's also the easiest to find. After-market support for the 360 is great, and with the right parts, it can easily make 450 horsepower and still have great street manners.
