Amazon.com: Customer reviews: The Real Vitamin and Mineral ...

Vitamins and minerals are two of the main types of nutrients that your body needs to survive and stay healthy. Vitamins help your body grow and work the way it should. There are 13 vitamins\u2014vitamins A, C, D, E, K, and the B vitamins (thiamine, riboflavin, niacin, pantothenic acid, biotin, B 6, B 12, and folate).

Vitamins and Minerals | National Institute on Aging

The difference between vitamins and minerals has to do with their chemical structure. Vitamins can be broken down, but minerals are inorganic and cannot be broken into smaller chemical units. Vitamins are essential, meaning we have to get them from our diet (or supplements ). Some, but not all, minerals are essential.

What Are the Benefits of Vitamin and Mineral supplements ...

The water-soluble vitamins are the eight B vitamins (B-1, B-2, B-3, B-5, B-6, B-7, B-9, and B-12) and vitamin C. The fat-soluble vitamins are A, D, E, and K. There are many minerals, but certain ones are necessary for optimal health. Minerals are split into two groups: major and trace.

The best foods for vitamins and minerals - Harvard Health

So-called fat-soluble vitamins -- that is, vitamins A, D, E, and K -- accumulate in the body, making overdosing a real threat. Vitamin overdoses have been associated with liver problems, weakened ...
